## ARINC 615/615A Portable Data Loader

### Application Scope

TechSAT's portable data loader **PDL Mk.III GARDT®** is an integrated software and hardware solution for loading aircraft software parts, such as databases and operational programs, into airborne computers according to the ARINC 615, ARINC 603, and ARINC 615A standards.

### Features

The loader is based on commercial-off-the-shelf parts and components.

The assembly's system design and the assembly itself are targeted at fulfilling ground support equipment (GSE) requirements. TechSAT's GARDT® Unit, which is compliant to the Airbus Security Requirements for Portable Data Loader, supplies the ARINC 429 resources.

TechSAT's PDL GARDT® Frontend application for Windows® serves as data loader utility.

The load parts can be imported to the internal media repository via any media type supported by the host computer.

The PDL Mk.III GARDT® is delivered with a connector cable to connect it to A615 or, optionally, A603 LRUs.

An interface to any FLS Management tool can be provided on request.

### eEnabled Software Management

#### "eESM" - the innovation project of Lufthansa Technik

Based on decades of experience in aircraft maintenance, LHT developed a beneficial administration software tool which supports the entire data handling process of LRU software updates. In close cooperation with its partner companies Corena and TechSAT, LHT extended this software to an integrated tool set which consists of three parts, using state-of-the-art technology, forming the all-encompassing solution:

- > the eESM software configuration / distribution management tool
- > the Data Loader Adapter
- > the Data Loader Family

The complete set is distributed under the brand name **eEnabled Software Management (eESM)** including TechSAT's Portable Data Loaders as the core product for data loading tasks.
